

## I have EB

I was **born** with it, and there is **no cure**.  
EB is **not** contagious.  
My skin is **extremely fragile**.  
I wear bandages to **protect** my skin.

Epidermolysis bullosa, or EB, is a rare genetic disorder. My body can't produce the protein I need to make my skin strong like yours. My skin blisters and tears very easily from friction or trauma. Currently there is no cure or treatment. Daily wound care, pain management, and protective bandaging are my only options.

 **IMPORTANT!**

**Extremely  
fragile skin**

**No tape/plasters or  
adhesive dressings**

**Emergency care  
information**
